

ITS Srl - Company Profile

1996. Born the ITS srl, synthesis of previous and long-standing experience in the areas of Security and Telecommunications. Target: to establish itself as a global partner for the supply of products and services with high innovative content.

The acceleration of information processes and their applications has seen, in fact, the ITS like protagonist to develop and bring to market integrated solutions with high added value.

The validity of this approach, as evidenced by the continuous increase of sales, confirm the soundness of the strategic choices of the ITS which characterizes it as "Market Oriented" company.

In this context, in 2005 was born the company S.T.S. (Technology Services Security), based in Savona, specialized in the provision of security services in the areas of radiolocation, alarm management, picketing, video surveillance and concierge.

Reliability

Being reliable is always our mission. Our aim is to tailor the most appropriate type of service to your company or public body. As a habit. It is a difficult job, but wearing it is another matter entirely.

A growth that knows no interruption over the years, thanks to modern technology, the choice of cutting-edge materials and systematic checks and certificates. The forward-looking use of new materials and new technologies, gives us the opportunity to offer excellent products to our customers.

The reliability of the product/service has previously verified by internal testing. Moreover, the high standards imposed by **IMQ**, represent a further incentive so that result evaluation is always objective and focused on improving.

Furthermore, the performance indicators relating to the quality perceived by the customer are fundamental to reach the higher standards for the maintenance of the **ISO Certification 90001:2008**.

Our services

Plant engineering

The construction of a plant, whether civil or industrial, is achieved primarily by the perfect knowledge of the environment of interest and any special features.

To ensure adequate quality of the proposal, the ITS performs, always, a careful preventive phase, development of the project in CAD, analysis of the solutions with the best value/budget available, installation, check, testing during the normal operation of the system, and final release of the project certified under Decree 37/08.

Are so proposed the most actual solutions and defined with the customer, the scale of the project.

Technology

The evolution of IT processes, innovations in electronics, related to large-scale applications, allows to ITS to offer integrated solutions with high added value increasingly high innovation.

The awareness of operating in a high-risk field, where the certainty of communications is a strategic factor, has focused the efforts of our company in research of the highest safety standards.

In particular, ITS is able to realize systems with automatic functions of "controller" and data transmission in remote site in all modes (even multiple) available (PSTN, ISDN, GSM, GPRS, IP, WI-FI).

Security

The proposal of ITS S.R.L is not limited to the simple supply of products or services but focuses on risk assessment. The contribution of information technology and telecommunications to active safety systems has allowed to significantly expand and integrate its performance.

The products offered are previously selected and tested for maximum reliability, according to the highest European quality standards.

Availability also of backup and automated checks on proprietary servers in "data center" ensures connection to the installed systems with absolute reliability.
